SUMMARY

Java Backend Developer with 1.3+ years of professional experience in Spring Boot, REST APIs, and MySQL, including hands-on work on a production healthcare EMR platform. Built a production-grade payment platform (RazorPay clone) using Kafka, Docker, Redis, and event-driven design patterns. Solved 350+ DSA problems on LeetCode with a 5-star HackerRank rating.

TECHNICAL SKILLS

Languages: Java, Python, SQL (MySQL, PostgreSQL)

Backend: Spring Boot, Spring Security, Spring Data JPA, Spring AI, REST APIs, JWT Authentication, API Key Authentication

AI & Architecture: Spring AI, RAG (Retrieval-Augmented Generation), Microservices, Reactive Programming

Messaging & Caching: Apache Kafka, Redis Caching, Concurrent Transaction Handling, Transactional Outbox Pattern, Idempotency Handling, Rate Limiting

Database: MySQL, PostgreSQL, Joins, Subqueries, Window Functions, CTEs, DBMS Concepts

Core Concepts: Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns (Adapter, Strategy, State Machine), Low Level Design, System Design

DevOps & Tools: Docker, Docker Compose, Kubernetes, Git, GitHub, Postman, IntelliJ IDEA, VS Code

Cloud & Others: Microsoft Azure (Basic), Apache Spark (Basic), PySpark

EXPERIENCE

Java Backend Developer (SDE-1) | *Mynx Softwares Inc., Noida*

May 2026 – Present

- Contributed to MyCaa500, a production healthcare EMR/EHR platform for the US market, built with Java and Spring Boot
- Built a new REST API for the platform, extending core functionality of the EMR system
- Identified and fixed a production bug on MyCaa500, improving system reliability

Software Engineer | *ThrivePass India Pvt. Ltd., New Delhi*

May 2022 – April 2023

- Developed 5+ backend features improving application performance by 15%
- Optimized code modules reducing bug reports by 20% and improving overall system stability
- Collaborated with QA and Product teams in Agile/Scrum environment, increasing sprint velocity by 10%

PROJECTS

RazorPay Clone – Payment Gateway Platform | *Java, Spring Boot, Kafka, Redis, PostgreSQL, Docker* | github.com/gaur-1999/razorpay

- Designed a payment gateway backend with a finite-state machine governing payment lifecycle (Created → Authorized → Captured → Settled/Refunded)
- Implemented a transactional outbox pattern with Kafka for reliable, at-least-once publishing of payment, order, refund, and settlement events
- Built Redis-backed idempotency handling and multiple rate-limiting strategies (fixed window, sliding window, token bucket) against duplicate/abusive requests
- Engineered a card vault with AES encryption/tokenization and an Adapter/Strategy-based payment processor router (Card, UPI, Net Banking)
- Built async webhook delivery with retry queue and DLQ handling; containerized the full stack (Postgres, Redis, Kafka, Control Center) via Docker Compose

Personal Finance Manager API | *Java, Spring Boot, MySQL, JWT* | github.com/gaur-1999/personal-finance-manager-api

- Built secure REST APIs with JWT authentication for stateless user registration and login
- Implemented income and expense tracking with category-wise and type-wise filtering using Spring Data JPA
- Developed a monthly summary API calculating total income, expenses, and net savings with date-based filtering

PROFESSIONAL DEVELOPMENT

Backend Development & System Design Practice (Self-Learning, ongoing alongside work)

- Solved 350+ problems on LeetCode and GeeksforGeeks — Arrays, Trees, Graphs, Dynamic Programming
- Completed Cohort 5.0 by Coding Shuttle, covering advanced Spring Boot, Kafka, Redis, and system design used to build the RazorPay clone project
- Strengthened Spring Boot, System Design, OOP, and Low Level Design through structured self-study

EDUCATION

B.Tech in Information Technology (AKTU) — 88%

GL Bajaj Institute of Technology & Management, Greater Noida | Aug 2018 – June 2022

CERTIFICATIONS

Java (CodeHelp) • MySQL (Udemy) • System Design (Programming Pathshala) • Spring Boot (Udemy)
